EDUCATION

University of North Carolina at Chapel Hill

B.A. Computer Science; B.A. Media and Journalism, Advertising/Public Relations; GPA: 3.72

Chapel Hill, NC

May 2027

SKILLS

Product Design: Figma, interaction design, interactive prototyping, wireframing, user flows, design systems, components, variants, tokens, libraries

UX Research: user interviews, guided usability testing, survey design, card sorting, competitive analysis, research synthesis

Development: React, Next.js, TypeScript, JavaScript, HTML, CSS, Supabase, FastAPI, WordPress

Evaluation & Analytics: Lighthouse accessibility testing, CTA analysis, content performance, engagement analytics

EXPERIENCE

Sensible

May 2026 – Present

Marketing & Brand Positioning Intern

Chapel Hill, NC

- Led discovery for Sensible's shift from a clinical device to a lifestyle product by auditing 3 website pages and supporting materials, interviewing 5 cross-functional stakeholders, and mapping journeys for potential users, investors, and community partners.
- Redesigned 3 website pages through 3 interactive prototype iterations, creating distinct early-access, investor, and QR/event journeys while refining navigation, CTA placement, and messaging through team feedback.
- Built and managed the responsive frontend, connected form submissions to Supabase, and transformed a previously static marketing site into an active acquisition and stakeholder-engagement channel.
- Established a reusable brand and UI foundation across voice, typography, color, and visual standards; created focus-group and interview guides and a structured insight-capture form to support ongoing product validation.
- Launched acquisition and study-recruitment touchpoints that generated 8 early-access and investor-interest submissions, 8.8K+ Instagram views, and supported recruitment of 60+ study participants.
- Presented product and positioning work to 20+ founders, mentors, and advisors through CED's GRO program and incorporated feedback before the startup's demo day.

App Team Carolina

Sep 2025 – Present

UI/UX Designer

Chapel Hill, NC

- Conducted guided usability testing with 3 users on the Carolina Cupboard app, identifying broken flows and visual defects before launch; partnered with developers to implement fixes and secured client sign-off.
- Translated a detailed clinical PRD into 12 iOS screens spanning PGY onboarding through surgical-step logging, collaborating with product managers and client stakeholders to clarify clinical requirements.
- Developed 3 concepts from sketches and wireframes through high-fidelity interactive prototypes, introducing progress rings, quick-select participant controls, and step-based logging to minimize data entry during rotations.

UNC Department of Applied Physical Sciences

Jan 2025 – May 2025

Undergraduate Teaching Assistant, APPL 110: Design and Making for Engineers

Chapel Hill, NC

- Guided 72 students through rapid prototyping, 3D printing, laser cutting, and iterative problem-solving while collaborating with faculty to improve course materials and project support.

SELECTED PROJECTS

Vanguard Year in Review | UX Research, Interaction Design, Figma

Client Project

- Conducted moderated usability testing with 5 investors ages 50–67, synthesizing observations into severity-ranked findings and using card sorting to improve information hierarchy and navigation.
- Translated research into an 11-screen interactive prototype featuring adaptive content views, year-over-year comparisons, and simplified financial summaries; presented recommendations to Vanguard stakeholders.

Flare | Next.js, FastAPI, Supabase

Pearl Hacks 2026 – 2nd Place

- Designed and built a real-time community emergency alert platform using decentralized reporting and community verification to improve the speed and reliability of local safety information.
- Mapped the reporting, verification, and alert experience while balancing rapid information sharing with user trust, community validation, and misuse prevention.

MetroMove | HTML, CSS, JavaScript, Flask, APIs

Pearl Hacks 2025 – 1st Place

- Designed and built a recommendation experience that translated budget, commute, safety, and walkability preferences into neighborhood matches using real-estate and third-party data.

LEADERSHIP

UNC Product Management Club, Director of Marketing: Created the club's visual identity system and developed an audience-informed content strategy for NeoMana Labs, translating research into a client pitch.

UNC Girls Who Code, Teaching Assistant & Outreach: Redesigned WordPress pages and supported 22 students through weekly instruction and office hours.
